i only just saw that Chao had sent something after independently working on my own attempt to tighten things up. thanks, Ravi and David, for the earlier drafts that i used as the basis for my own attempt. jj

Yes, I agree. We can use the version Chao has just sent around as the basis for further revision. If anyone wants to reinsert something from an older version, do so to this version.

Ravi.

Hi all,

I took DB version and accepted all changes before making my own comments and editing. Since the DB's version reflects comments by both RS and DB, to make our meeting efficient, we may use the accepted Version for our discussion in the meeting.

Chao

Ravi,

Thank you for organizing us.

You, Chao and Jennifer may well have "larger picture" issues to discuss about the draft and we should start with those. But, I read the draft, and have flagged some relatively minor wording changes we might want to change. Given lots of marks if one looks at the full trackchanges history, I tried to highlight any text I consider changing today, and use comment bubbles to explain why.

David

I based my edits on David's longer revision of Kenny's and incorporated Jennifer's. Chao, I am not sure if I have done your comment any justice, so let us discuss that for sure. I used track changes, and inserted comments whenever I deleted any text from David's version. I see our meeting to be short today. Even though Kenny will not be there, I suggest this would be the most efficient way of arriving at a final version that we can send to him as opposed to multiple iterations by email. I will bring copies to the meeting.

Ravi.
